The mission of the NRC Research Associateship Programs (RAP) is to promote excellence in scientific and
technological research conducted by the U.S. government through the administration of programs offering
graduate, postdoctoral, and senior level research opportunities at sponsoring federal laboratories and affiliated
institutions.

In these programs, prospective applicants select a research project or projects from among the large group of
opportunities listed on this website. Prior to completing an application, prospective applicants should contact the
proposed Research Adviser to assure that funding will be available if their application is recommended by NRC
panels. Once mutual interest is established between a prospective applicant and a Research Adviser, an
application is submitted through the NRC WebRap system. Reviews are conducted four times each year and
review results are available approximately 6-8 weeks following the application deadline.

PARTICIPATING AGENCIES

Prospective applicants should read carefully the details of the program to which they are applying. In particular,
note eligibility details. Some laboratories have citizenship restrictions (open only to U.S. citizens and permanent
residents) and some laboratories have research opportunities that are not open to senior applicants (more than
5 years beyond the PhD). When searching for research opportunities you may limit your search to only those
laboratories which match your eligibility criteria. In addition, note the application deadlines, as not all
laboratories participate in all reviews.
